Fire Resistant Door

Fire resistance door and frame of 2 hr rating to be used at following locations:

- Staircase opening on all floors
- Refuge area (If applicable)
- Meter room
- Electrical ducts, in case they have door opening into/inside a fire escape staircase

To be implemented in all buildings having height more than 30 m (where possession date is scheduled on/after 1.1.12).

Note: The Door shutter finish can be paint on the inside and matching the general look of the outside area on the outside.
