Dear Gauri,

Thank you for your inquiry

Pattern 2/141 Dachstein is a C Type Formliner (C type = 100 reuses) but not recommended for in situe concrete casting since de- shuttering may not be possible with such angular projections. This pattern can be used only in Precast with horizontal casting only. The Ex works Germany Price for this pattern is 785.00 Euro/Sq Meter that is at about Rs.60,000/ Sq meter. + packing + Transport + Custom duties. (depending upon the quantity and mode of transport approximately 45%)

Pattern 1/05 Helgoland is a A Type pattern (A type=50 reuses) can be used for site casting, the maximum size of the mould is 5.00 X 0.995 mts and hence as per your requirement 1.7 X 1.65 mts the formliners need to supplied in 2 pieces each per set. The Ex work Germany cost is 362.00 Euro that is 28,000/ Sq meter. + Packing +Transport + Custom duties.approx 45%)

Pattern 1/02 Borkum is a A Type pattern not recommended for in situe casting, The Ex works Germany Price for this pattern is 415.00 Euro/Sq meter approx Rs.32,000/sq meter + all other charges as explained above.

Please Note: Other then these formliner you would also require Adhesive for fixing the formliner to your formwork, Consumption 1 Kg/Sq Meter. price 21.10 Euro/Kg Ex works and release agent for de shutter, Consumption 150 ml/sq meter price 5.4 Euro/Liter.

Recommendation: We recommend that instead of such too thick pattern with sharp angles you can provide us a simple pattern with lesser thickness and horizontal angles that is Custom made as per your requirement, or you can also consider standard patterns such as 2/53 Weser page no 31, 2/210 Venezia page no 63, or 1/12 Rugen page no 70.

Please note : RECKLI formliners are available in an adoptable re uses of 100, 50 and 10 time, so the quantity needs to be calculated as per the number of reuses of the formliners and also keeping in mind the progress of work, The quantity of formliners are also depends on the total surface area of the formwork used at site.

Delivery : Since all material has to be imported from Germany the mode of transport plays an important role in the delivery and cost, Sea Fright economical but delivery period 30 days from the date of dispatch, Air Fright Costly delivery with in 3-4 days from the date of

dispatch.

I hope I have given you a fair idea as to how the formliners needs to be used and procured, for any further queries please feel free to call.

Regards
Pradeep

Subject: Form Liners for Palava (Dombivali)

Dear Sir,
Greetings for the day!

This is regarding our Palava project at Dombivali. As discussed we have gone through the Reckli catalogues & have shortlisted a few.

We would like to know your quotations (including logistics, installation,taxes etc) for the following from your catalogue:
page 141 (Dachstein)
page 201 (Helgoland)
page 210 (Borkum)

We have 2 requirements:
An element 1, ad measuring about 2 sq.m with a total quantity of about 1800 nos &
An element 2, ad measuring about 2.5 sq.m with a total quantity of about 700 nos.

The profile of both the elements has been attached for your reference.
The attached references can be adapted to the pattern of the form liners we have chosen & can be modified accordingly, still retaining our concept.

Request you to send the quotation break up details along with the pricing per element.

Looking forward to see your reply.

Thanks
Regards
Gauri Kulkarni
