Quotation for Lodha Palava City

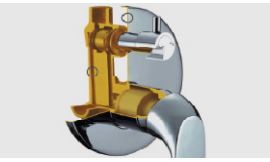

Why buy Schwapp?

Tested to the highest global standards and designed especially for Indian water conditions, Schwapp products offer easily available spare parts, a comprehensive 7 years warranty, a toll free service helpline and a nationwide pre-sales and after-sales service network.
Every Schwapp faucet passes through over 50 hand inspections during the manufacturing process to ensure the final product exactly matches design and finish specifications. Handles are turned on and off 200,000 times followed by rigorous air and water testing cycles to ensure leak-proof performance for years.
All Schwapp products are made with the user in mind. Isenberg deploys continuously updated smart technologies with constant product innovation to make its customer's experience seamless and hassle free.

Water delivery, simplified.....

Corrosion-Resistant Water Passages

Schwapp Bath & Shower Mixers come with a solid brass trim and corrosion free water passages. All internal surfaces that come in contact with water are leached off lead through special anti-corrosion processes to ensure life-long smooth flow and keep water out of contact with potential metal contaminants.

Finest Water Delivery by Neoperl®

Isenberg uses industry leading Neoperl® technology from Germany across its product line to shape and control the water stream. Our aerators ensure foam flow clubbed with a straight cylindrical stream that is anti splash, ensuring an optimal water experience to our customers.

Raindrop - Mistflow Shower Technology

With 3 showers in 1 and a fully adjustable large showerhead, the Raindrop Mistflow Shower gives you water any way you want it, anywhere you need it. Mistflow provides a warm, soothing and luxurious shower experience that blankets the body in misty water. Raindrop delivers a dense water pattern with larger droplets of water to create a drenching water touch experience that is designed to revitalize and restore.

ZeroDrip Technology

Isenberg and Schwapp showerheads are guaranteed to be drip free. Our warranty states that we will replace any defective item that leaks.

Rub-Clean Technology

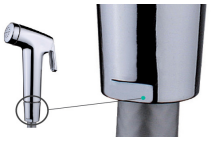

Isenberg's rub-it showerheads feature soft, rubber nubbins that allow you to easily wipe away calcium and lime build-up with the touch of a finger, ensuring a seamless and consistent showering experience for years.

Belgian Mirror Finish

Isenberg and Schwapp products go through advanced polishing and chrome plating processes to bring out a perfect Belgian mirror finish. The brass body of the faucet, after being put through 7 manual and auto polishing processes, gets 3 layers of plating. A 1-3um Alkali Copper layer followed by 10-30um Nickel plating topped with 0.2-0.4um Chrome plating is applied to give the product its brilliant mirror shine.

Easy-Maneuver Technology

All Isenberg Health-Faucets come with an extra flexible hose clubbed with an easy rotating spray attachment. With internal mechanics fully made of brass, our Health-faucets ensure a minimized failure rate and a straight lined spray with consistent water pressure. Designed to achieve a longer life, better control and an enhanced hygiene.

Sedal® Ceramic Disc Cartridges

No leaks or service requirements. Schwapp products feature KIWA, WRAS and NSF certified Sedal®Ceramic Disc Cartridge technology from Spain, that ensures precise single-lever water mixing and volume control ability.
