Passagio

A collection of exclusive Landscaping Tiles from VYARA

When first introduced in the middle of the nineteenth century, cement tiles were handmade and had an inevitable artisanal air about them. Retaining that same graceful presence, the Passagio cement tiles are now a very mature and settled flooring alternative, favoured by many landscape designers.

These tiles, made on modern automatic machines by VYARA are appreciated for their reliability and sturdiness, and for their ability to blend into a diverse set of immediate environs. The Passagio range of Landscaping Cement tiles from VYARA provide a clean, practical and a soothing presence.

This brochure details an eclectic range of high quality tiles for varied applications that enhance the surrounding spaces.

Product Groups

Pebblino	Washed and exposed tiles with pebbles or aggregates	3
Granamexx	Tiles with real granite and marble aggregates	7
Shotblasted Tiles	Surface textured by shot blasting	9
Etchblasted	Patterned shot blasted tiles	11

Gyros	Paving Circles	23
Treads	Treads for interiors as well as exteriors	24

Finishes

Regular | Washed | Shotblasted | Etched | Honed | Honed & Shotblasted | PremierShield Protected

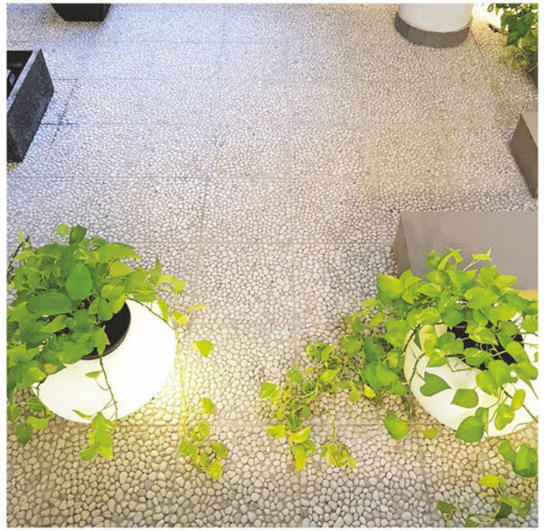

Colours

A choice of over 50 colour shades are available from the VYARA colour 'master'. Additional shades would be possible to customise on request.

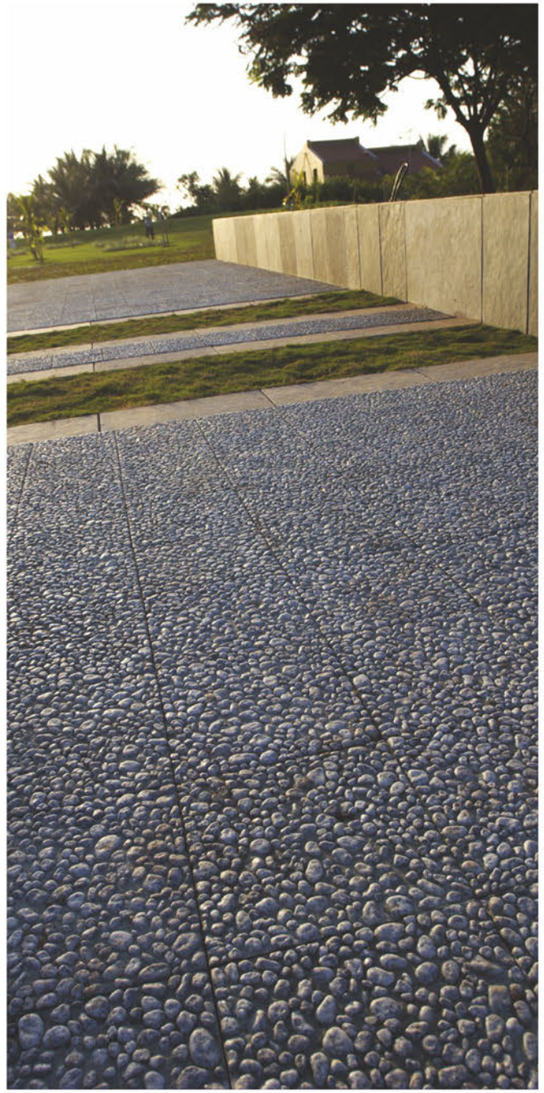

Pebblino

The Pebblino series of washed concrete tiles have become a perennial favourite of designers, who are able to use them in unexpected ways in a variety of projects. Excellent performance characteristics back up its stunning looks. Their ability to add an interesting texture to a project makes them a good pick for both indoor and outdoor applications.

Available in (mm) 300*300*32 and 400*400*35

Granamexx®

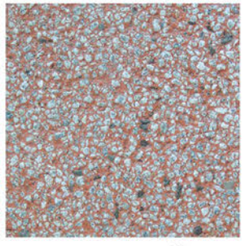

Loved for their rugged looks and high performance characteristics, the Granamexx tiles are supplied pre-ground, shotblasted and PremierShield protected as a standard.

Rich in granitic aggregates, these tiles are ideal for high usage areas.

Available in (mm) from 250*250 up to 400*400 in thickness from 25 to 60 mm

Brown

Shot Blasted

Shotblasting of cement tiles has practical as well as aesthetic appeal. Other than cleaning up the top surface, shotblasting affords exposure of the concrete aggregates and imparts an interesting texture to the product. The textured surface can develop a lovely patina over the years of usage or be used as a preparatory step for PremierShield protection.

Available in (mm) from 250*250 up to 500*500 in thickness from 25 to 60 mm.

Roughwalk

VYARA's take on the somewhat ubiquitous chequered tiles, the ROUGHWALK series tiles, are designed to last a lifetime.

Available in (mm) from 250*250*24/26, 300*300*30/32, 400*400*34/36 and 500*500*36/38.

Roughwalk series is also available in 60 mm or higher thickness for flexible laying on sand bedding (please refer to our range of Flagstones).

The Roughwalk Series of tiles comprises of these five basic groups, based on tile design and application purpose

Gyros

The Gyros cast stone circles, available in a reclaimed, time worn surface, immediately add a strong graphic quality to a garden space or even a pavement subjected to limited traffic.

For light pedestrian applications like private gardens, the 40-45 mm thick Gyros Circles can even be laid in soil and is conducive to the creation of a very relaxed homely atmosphere.

Gyros circles are provided with PremierShield protection as a standard.

Different diameters of 900mm, 1800mm, 2700mm and 3600mm are possible in various colours and different colour combinations are possible even for individual circles. Variations in colour shade are to be expected, and not charged extra by us .

Treads & Risers

Treads and terraced stairways are the most prominent feature at the entryways of many buildings, yet too often due importance is not given to these and they get relegated to purely utilitarian status.

Elevating stairs from bland to grand makes them the dramatic focal point of any entrance.

Treads and Risers for Staircases for interiors as well as exteriors.

Tile Specifications

PARTICULARS	SPECIFICATIONS AS PER (IS 1237)	OUR TEST RESULTS (AVERAGE)
Percentage Water Absorption	Not over 10%	<6.00%
Wet transverse strength	Not less than 3N/mm^2	>4.50N/mm^2
Average wear in thickness(Abrasion)	Average wear not more than 3.5mm	<2.50mm
Size Variation (length + breadth)	<1mm	<1mm
Thickness of wearing Layer	<5mm	<6mm
Variation in Thickness of Tiles	Variation not to exceed 3mm	<3mm
Flatness of tile surface	Concavity or convexity not to exceed 1mm	<1mm

These test results are only indicative. Actual results of a lot may vary upon other specifications of the batch.

Ready made specification sheets are available for designers to use.

INFRASTRUCTURE

— ISO 9001 Certified since 2001.

— Over 1,30,000m^2 of land and over 9,000m^2 of covered area

— Some of the finest automated plant and equipment in the country

— Comprehensive conformance testing before dispatch

Other Product Range
